

THE UNMISTAKABLE FEELING OF SUPERIOR CONTROL

Ambu® SPUR® II

Ambu

Ambu[®] SPUR[®] II

Secure Handling in Stressful Environments

- Improved recoil time and superior control
- No risk of cross-contamination
- Environmentally safe and disposable

Your Idea

Can you recreate “the Ambu feel” in a disposable device? Providing you with exceptional tactile and visual feedback during resuscitation has characterized our high-quality resuscitators since we invented the world’s first self-inflating resuscitator over 65 years ago. When asked if there was room for improvement, your request was clear: Could we add the Ambu feel to a disposable resuscitator?

Our Work

Bringing our finest molding experts together, we created SPUR II, a resuscitator with an optimized shape in a phthalate-free and PVC-free material, that ensures the world's best recoil time and superior control. Ease of handling without risk of cross-contamination is what makes the difference at the end of the day.

Key Benefits

Unique single-shutter valve system for reliable functionality

Integrated handle for user comfort and uniform compression

Thin-walled compression bag allows for lung compliance and "feel"

SafeGrip™ surface for secure handling in stressful environments

Swivel between valve and mask permits 360° positioning of the Ambu® SPUR II® in relation to the patient

Ambu FOREVER FORWARD

The Resuscitator with Improved Recoil Time

The Ambu SPUR II provides users with exceptional tactile and visual feedback during resuscitation. The bag is highly responsive, with minimal mechanical resistance – some say it is a natural extension of the hand. The bag itself is thin and responsive, while our SafeGrip™ surface ensures that Ambu SPUR II can be firmly squeezed.

Our convenient handle makes it easier to hold the unit and to ventilate a patient with just one hand if necessary. And our characteristic design provides optimum stroke volume with perfect recoil, yet it is smaller and lighter than most other disposable units.

Optimal Control

Our unique single-shutter valve has proven its reliability over two decades of emergency and hospital use. The crystal clear valve housing provides an unimpeded view of the valve operation, and the slim design makes it easier to view the mask.

Adult and pediatric sizes have a soft splash guard for user safety and all pediatric and infant sizes are equipped with an override valve system that helps prevent lung pressure that is too high. All bags are color coded for fast identification of infant, pediatric and adult sizes.

The Best Resuscitator You'll Ever Throw Away

Ambu SPUR II is the only resuscitator that is made from a SEBS material instead of PVC. This classifies Ambu SPUR II as environmentally safe and disposable, eliminating all risks of cross-contamination.
